Recycle Today.....
Compost at Home

- Holds up to 10 cubic feet or 80 gallons, weighing only 20 lbs empty, made from recycled polyethylene that is UV resistant and a deep black color to improve heat conditions inside this hot pile of black gold.
- A special twist top lid allows a better control of ventilation, it has slots that are large enough to let oxygen in yet keep critters out, twist pegs fasten to the ground for animal and wind control.
- Has a sliding door that can be secured to prevent unwanted rodents or other animals as well as being free of corners (where materials can easily dry out).
- No special tools are required for assembly, no holes need to be dug for setup and the assembly is snap together and for simplicity.
- Kitchen wastes and garden debris can be broken down efficiently.
- Hyperthermophilic microorganisms flourish with the ongoing access to oxygen; heat and nitrogen based organic materials.

33 inches high, 33 inches deep and
 34 inches wide.
